VSim and Digital Karnak Feedback Form

The following questions are broken into four categories: (1) demographic information, (2) the project concept, (3) the VSim software itself, and (4) the Digital Karnak package as a new form of scholarly publication and peerreview platform. Please answer those most relevant to your use of the software and/or model.

SECTION 1: DEMOGRAPHIC INFORMATION

Α.	Overall, rate your familiarity this experience	y with 3D environments	prior to	novi 1	ce 2	3	4	> 5	expo	ert 7
В.	Are you personally involved 3D content?	l in research projects tha	t involve	No	Yes					
	If yes, please describe									
С.	Computer platform used du	ring testing		PC	Mac					
D.	List models used during test	ting								
Ε.	Which most closely describe	es your role at your Univ	ersity?							
	☐ Undergraduate ☐ Grad ☐ Other:	I Student □ Ass't Prof	☐ Assoc. Prof	□ Pro	ofessor	□ Sta	iff 🗆 1	Гесhno	logist

5. Presuming access to appropriate 3D content, how likely are

you to use VSim as the basis for an assignment?

Why?

6.	What aspects of interactive computer models do you think are most important for creating a satisfying use experience? (Check all that apply)						
	□ Responsiveness of the model (frame rate) □ Intuitive navigation □ Amount of detail in model □ Model based on factual evidence □ Interactive options within the model □ Inclusion of social media □ Other:	□ Photo-realism □ Sound □ Technical support/access to help menu □ Inclusion of avatars □ Interpretative information within the model □ Clarity of connections to source material					
7.		te of narratives and embedded resources to explain the a model package to feel comfortable using it in a lecture of					
8.	What concerns do you have about using this type	of 3D content in the classroom?					

SECTION 3: THE SOFTWARE

The VSim prototype was developed with the needs of educators in mind. The features support classroom interactions with 3D content within a simple and flexible framework that can be used with both academically generated models and student projects. Questions in this section are focused on the software, its ease of use, and suggestions for improvement.

9.	How challenging was it to underst	and the basic software	supe	er easy			-> ve	very difficult				
	features?		1	2	3	4	5	6	7			
10.	How much time did you spend rea	ading the documentation?	didn	't reac			>	two ho	urs			
			1	2	3	4	5	6	7			
11.	How challenging was it to learn to navigate?			er easy			-> V6	ery diffic	cult			
		-						6				
12.	Which navigation mode did you fa	avor? Check all you liked										
	□ WASD ('1')□ Narratives (playing/pausing)	☐ Flight Simulation ('2') ☐ Narratives (as jump points)		-		ation (' led Re	•	es				
13.	What did you particularly <i>like</i> abo	out the software and/or its main fe	eature	s?								

14. What did you particularly *dislike* about the software and/or its main features?

15. What other features do you think should be added to make the software more useful in formal or informal educational settings?

16.	If you are involved in research that includes 3D content, what other features should be added to make the software more useful for research?
17.	What general suggestions do you have to improve the software?
18.	Please describe any reproducible software errors/crashes you encountered.
If v	ou used the software with your own content, please answer questions 19-22.
_	Please describe the workflow/process you used and any challenges you encountered.
19.	riease describe the workhow/process you used and any chanenges you encountered.

21.	If we adde	ed additiona	al loaders, v	what file fo	ormats would be most u	seful?						
	□ .3ds	□ .obj	□ .dxf	□ .shp	☐ Other:							
22.	read-only and embe narratives	binary file s dded resou	so that you rces for dis dded resou	re not sha stribution,	erty protections. Export aring your raw files. The create a 'package' that on the expiration date for the	softwa combir	are also nes a ro	o allow ead-on	s you t Iy mod	o 'loc lel wi	k' narrat th locked	tives

	Why?											

20. What's your preferred modeling software?

SECTION 4: THE DIGITAL KARNAK PACKAGE

23. Overall, rate the Digital Karnak package

If you interacted with the Digital Karnak package, please complete the following questions.

One of the challenges of working with 3D content is accommodating the peer-review process. VSim enables peer review through a combination of the narrative and embedded resource functions. Depending on their needs, content creators can build narratives to lead colleagues and reviewers through the computer model, they can develop a suite of embedded resources to reference source material and describe interpretive decisions, or some combination of the two. Once completed, VSim can export the package into a single file for distribution. The questions in this section are focused on the peer review package developed by the Digital Karnak team. Their strategy involved packaging eight different phases of the interactive Karnak model with a series of narratives to explain the reconstruction and a suite of embedded resources that enabled both free-form exploration and sequential review of categorized annotations and weblinks.

----> excellent

	Why?		1	2	3	4	3	U	,
2.4	The made as included as this law one	to interpolativitle the content. W	dhiah a	J: al a	مدر لد ما د	+	.fl.2 /c	د باد د داد	
24.	The package included multiple ways that apply)	to interact with the content. W	THICH C	iia you	iiia iii	ost use	iuir (C	песк а	!!
	□ Narratives (playing/pausing)□ Links to Digital Karnak website	☐ Feature Index☐ Sequential review of Embe	dded			exploi	ration		
	Why?								

25. As a peer reviewer, how comfortable would you feel rating 3D content if it were packaged like this?

Why?

26. When acting as a reviewer, journals will often provide a list of factors to consider in the review. What factors should appear in this list for the review of 3D modeling content? (Question from CAST survey)

27. Presuming you were asked to review the Digital Karnak package and were returning it with a 'revise and resubmit' ruling, what suggestions would you make to the authors?

28.	Please share any thoughts or concerns you have about subjecting 3D content to the peer-review process.
29.	Please share any other thoughts or concerns you have about 3D content that were not incorporated into previous answers.
Lisa UCL 530 Los Imse	en you've finished with the feedback form, press the SUBMIT button below to e-mail it to the project team. Ou have any questions, comments or concerns about the research, please contact: M. Snyder A Office of Information Technology/Institute for Digital Research and Education 8 Math Sciences, Box 951557, Mail Code 155705 Angeles, CA 90095-1557 @idre.ucla.edu 1) 825-8487
